

Brainstorm & Idea Prioritisation

Date	12-06-2026
Team ID	
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	4 Marks

Brainstorm & Idea Prioritisation :

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem-solving. Prioritising volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Selecting the Problem Statement

- Conducted a team discussion to identify challenges faced by students during learning.
- Analysed common issues such as stress, confusion, frustration, and lack of personalised support.
- Selected the problem statement:
"Develop an AI-driven Emotion Detection and Personalised Learning Support Platform that identifies students' emotions from text and provides personalised learning guidance."

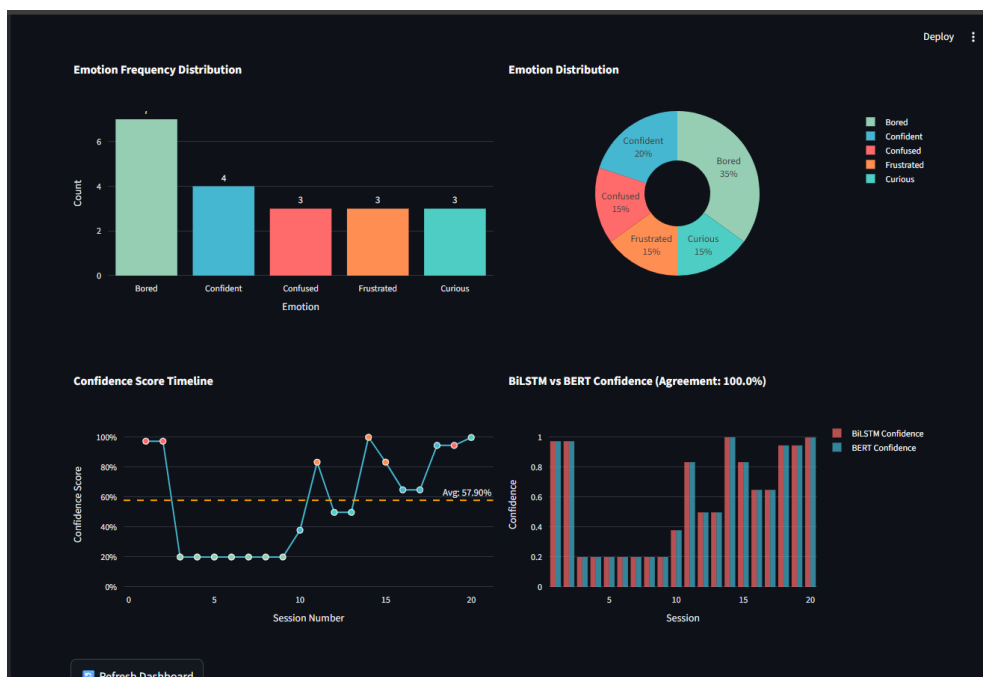

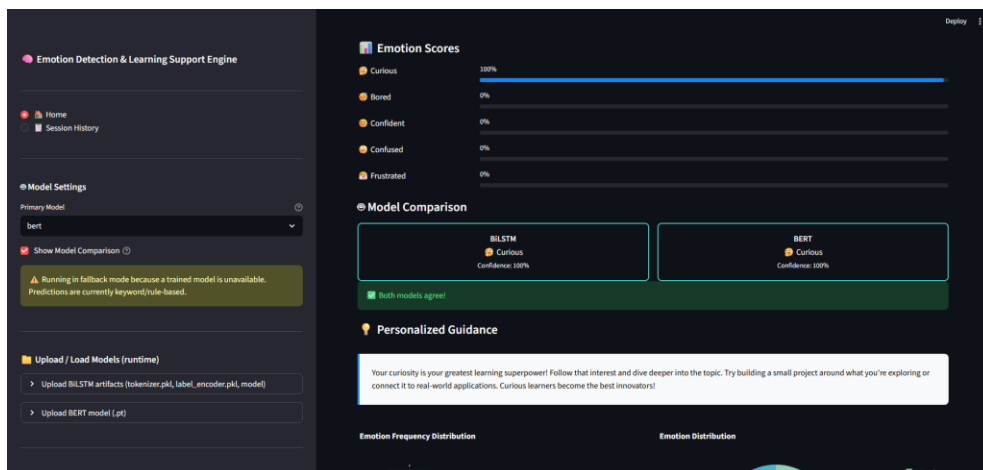

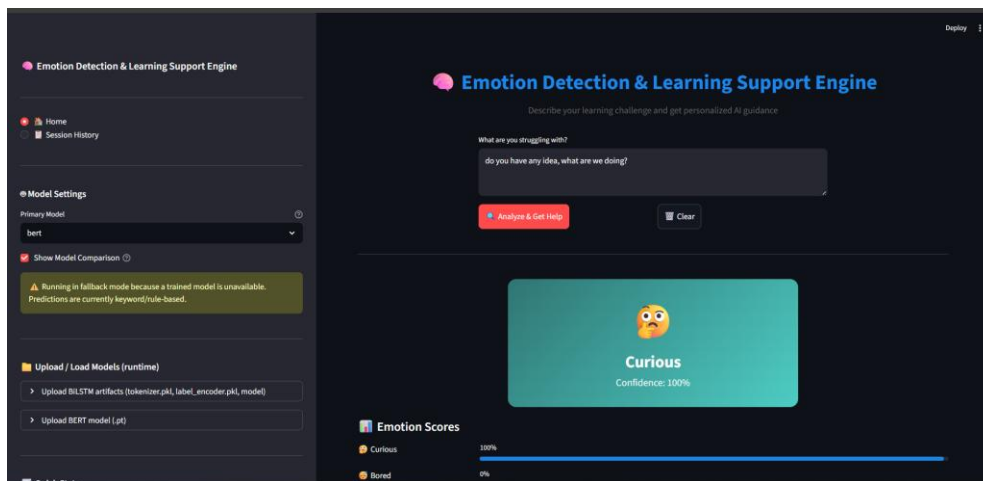

Step-2: Brainstorm, Idea Listing and Grouping

Ideas Generated:

- Detect student emotions using AI/ML models.
- Recommend personalised learning strategies.
- Compare multiple emotion detection models (BiLSTM & BERT).
- Generate supportive responses using Gemini AI.
- Provide learning analytics through an interactive dashboard.

Idea Grouping:

- **Emotion Detection:** BiLSTM, BERT, NLP.
- **Personalised Support:** AI-generated learning recommendations.
- **User Experience:** Streamlit dashboard, analytics, visualisations.

Step 3: Idea Prioritisation

- **High Priority:** Accurate emotion detection using AI models.
- **High Priority:** Personalised learning recommendations.
- **Medium Priority:** Model comparison and performance analytics.
- **Medium Priority:** Interactive and user-friendly dashboard.
- **Low Priority:** Future enhancements such as voice-based emotion detection and multilingual support.
